Power to EMPOWER

Having been rendering exemplary services towards fulfilling the power demand in the state, Udupi Power Corporation Limited has parallely kept its priorities on the welfare of the district through its innovative and effective corporate social responsibilities.

M. Raghunath

This rural district had很多 many battles for kerosene and inferior cooking fuel. But the last 15 years of relentless struggle seems to have reached a logical conclusion and has brought joy to several villages around the industrial belt of the district. A thick veil of hope has been casted to ensure that there is an industry in their neighborhood which takes care of their needs, right from the daily daily demands of water and energy to even their children's education.

Thanks to the Udupi Power Corporation Limited (UPCL) project by Adani group of companies, there is a new dimension of how an industry can spur growth all around and make a positive change in the lives of people in the project catchment.

The UPCL Adani Ultra-modern thermal power plant, capable of producing 2000 megawatts of power, is situated in Yelluru in Udupi district. And it has taken its Corporate Social Responsibility (CSR) programme to the highest benchmark not just in Karnataka but in the entire country.

According to the UPCL, it has implemented several CSR activities in various villages within its vicinity. UPCL has spent about Rs. 280 crores over the past years on various social schemes and have constructed schools, community halls, health centres, playgrounds, and several other amenities.

In seven villages, the UPCL has ensured that the quality of life in these villages has improved to a great extent.

One can also witness the difference made to the villages around the plant. From improved water supply to increased road connectivity, there has been a visible change. Safe drinking water, education, and health care have all seen an improvement.

The Adani Group, through its CSR initiatives, has brought a new lease of life to these remote villages. The group has ensured that the local population has access to quality education, healthcare, and other social amenities.

In addition to this, the UPCL has also initiated various programs to improve the quality of life in rural areas. These include providing electricity to remote villages, constructing roads, and developing water sources.

The UPCL has also established several educational institutions, including schools and colleges, to provide quality education to the children of these villages. These initiatives have not only improved the quality of life in these villages but have also contributed to the overall development of the state.

The UPCL has also taken steps to promote the use of renewable energy in these villages. The use of solar power has reduced the dependence on fossil fuels, making these villages more sustainable.

In conclusion, the UPCL and Adani Group's CSR initiatives have brought a significant change in the lives of people in these villages. Their commitment to social responsibility is an inspiration to other organizations to follow suit.

If the family had a semi skilled or skilled member, he or she was also given jobs with an insurance pack-

Adani Group has also invested in several social welfare projects in the surrounding areas, including the provision of drinking water, electricity, and education. These initiatives have been implemented in collaboration with local authorities and communities.

The UPCL has also played a significant role in promoting the use of renewable energy in the region. The company has installed solar panels and windmills to generate electricity, which has helped in reducing the dependence on fossil fuels.

In addition to this, the UPCL has also initiated several programs to promote eco-friendly practices. These include the promotion of tree plantation drives, waste management initiatives, and the use of eco-friendly materials in construction.
